ONE DAY ON VENUS

LASTS LONGER THAN ITS YEAR

WEST THE SUN RISES HERE

1 YEAR = 225 EARTH DAYS

1 DAY = 243 EARTH DAYS

A year ends. The day is still turning.

A MONDAY THAT LASTS LONGER THAN A YEAR

Send it to the friend who says Mondays last forever.

SPACE AT HUMAN SCALE · EP 02 | Sources: NASA, Britannica

VENUS IN 5 FACTS

243 Earth days for Venus to turn once

225 Earth days for one trip round the Sun

WEST The Sun rises in the west: Venus spins backwards

95% of Earth's diameter: our closest neighbour

465°C surface heat, hot enough to melt lead

Surface pressure about 90 times Earth's, under thick sulfuric acid clouds. Worst holiday destination ever.
